Robotics Workshop CGT & Lab Automation

In our robotics workshop we will show you everything about our modular and flexible automation solution for the fields of cell and gene therapy as well as for laboratory applications! In addition to exciting presentations you will experience two usecases live on site - one of them with our partner for filling technology groninger & co. GmbH from Crailsheim.

Prototype equipment for inoculum preparation

- Modern and user-friendly HMI based on the latest the latest Siemens technology
- Cleanroom robot with multifunction gripper (pipetting & handling)
- Opening, closing and automated handling
- of cryo vials, Falcon tubes and bottles
- Automated pipetting from 1ml to 50ml
- Demo process for inoculum production of Cells in suspension

Cryo-vial filling with groninger

- Demo of filler module with peristaltic pump
- Filling process and user interface
- Presentation of the Labworx benchtop filling module with a robot from Pharmabotix

Further information such as the agenda and registration details can be found at www.pharmabotix.ch/events.
